

Legume

**Clover, Berseem**

*Trifolium alexandrinum*

## PLANT HARDINESS ZONE 4 DATASET

### COVER CROP DESCRIPTION

Also known as Egyptian clover. Used as a summer annual in the Northeast US. Least cold-hardy clover. Does not do well on droughty soils due to its shallow root system. Excellent N producer. High biomass and N production potential. Inoculate the seed with appropriate *Rhizobium* spp. Good in mixes with other species that winter-kill, especially grasses such as oats.

Planting and Growth Windows

Frost Seeding	N/A
Reliable Establishment	05/15 - 07/31
Temperature/Moisture Risk	N/A
Active Growth Period	Summer
Winter Survival	Never
Can Interseed	N/A

Extended Comments

**Nematodes:** Host for root-knot and soybean cyst nematode

**Pollinators:** Delay termination until at least 30-50% bloom to maximize value to pollinators.

**Termination:** If using herbicides to terminate use a tank mixture (e.g., glyphosate + dicamba or 2,4-d)
